| Preface | xix |
| The Sea Change in Data Protection | xx |
| Who Should Read This Book | xx |
| What Should You Read | xxii |
| Acknowledgments | xxiii |
| About the Author | xxv |
| Chapter 1 The Time Has Come for Change | 1 |
| 1.1 What to Look for in This Chapter | 1 |
| 1.2 Why Data Protection Is Important | 1 |
| 1.3 What Data Protection Is | 2 |
| 1.4 Data Protection Has to Be Placed in the Right Framework | 3 |
| 1.5 Evolving to the Governance, Risk Management, and Compliance Framework | 4 |
| 1.6 Ride the Sea Change in Data Protection | 4 |
| 1.7 How to Read This Book | 5 |
| 1.8 An Aside on Process Management | 7 |
| 1.9 Key Takeaways | 7 |
| Chapter 2 Business Continuity: The First Foundation for Data Protection | 9 |
| 2.1 What to Look for in This Chapter | 9 |
| 2.2 Business Continuity as a Key to Risk Management | 9 |
| 2.3 Business Continuity and Data Protection | 10 |
| 2.4 Business Continuity Is Not Just Disaster Recovery | 11 |
| 2.5 Disaster Recovery: Let's Get Physical | 14 |
| 2.6 Operational Recovery: Think Logically | 16 |

| | | |
|------------------|---|-----------|
| 2.7 | Disaster Recovery Requires Judgment; Operational Recovery Requires Automation | 17 |
| 2.8 | Logical Data Protection Gets Short Shift in Business Continuity | 19 |
| 2.8.1 | Logical Problems Feature Prominently in Data Loss or Downtime | 20 |
| 2.8.2 | Logical Data Protection Problems Manifest in a Number of Ways | 20 |
| 2.9 | Do Not Neglect Any Facet of Data Protection | 22 |
| 2.10 | Key Takeaways | 22 |
| Chapter 3 | Data Protection—Where the Problems Lie | 25 |
| 3.1 | What to Look for in This Chapter | 25 |
| 3.2 | Data Protection as It Was in the Beginning | 25 |
| 3.3 | Typical Data Protection Technology Today Still Leaves a Lot to Be Desired | 29 |
| 3.3.1 | Operational Continuity/Physical: Generally Strong, but Some Improvement Needed | 31 |
| 3.3.2 | Operational Continuity/Logical: More Attention Needs to Be Paid to Logical Data Protection | 32 |
| 3.3.3 | Disaster Continuity/Physical: Done Well, but Cost and Distance Are Issues | 32 |
| 3.3.4 | Disaster Continuity/Logical: The Danger of Being Under Protected May Be Very Real | 34 |
| 3.4 | Summing Up Data Protection Challenges by Category | 34 |
| 3.5 | Key Takeaways | 36 |
| Chapter 4 | Data Protection—Setting the Right Objectives | 37 |
| 4.1 | What to Look for in This Chapter | 37 |
| 4.2 | How High Is High Enough for Data Availability? | 37 |
| 4.3 | SNIA's Data Value Classification: A Point of Departure | 39 |
| 4.4 | Do Not Equate Availability with Value | 41 |
| 4.5 | Availability Objectives for Operational Recovery and Disaster Recovery Are Not Necessarily the Same | 44 |

| | | |
|------------------|--|-----------|
| 4.6 | Availability Is Not the Only Data Protection Objective | 45 |
| 4.7 | All Primary Data Protection Objectives Have to Be Met | 47 |
| 4.8 | Key Takeaways | 48 |
| Chapter 5 | Data Protection—Getting the Right Degree | 49 |
| 5.1 | What to Look for in This Chapter | 49 |
| 5.2 | General Use Classes of Data | 49 |
| 5.2.1 | Tape Is a Special Case | 50 |
| 5.2.2 | Understanding Degrees of Data Protection | 51 |
| 5.3 | The Third Degree—Levels of Exposure | 52 |
| 5.3.1 | Mapping Degrees of Protection | 52 |
| 5.4 | Key Takeaways | 54 |
| Chapter 6 | Information Lifecycle Management Changes the Data Protection Technology Mix | 57 |
| 6.1 | What to Look for in This Chapter | 57 |
| 6.2 | Why Data Lifecycle Management Is Not Enough—The Need for Metadata and Management | 59 |
| 6.3 | ILM Is Deep into Logical Pools of Storage | 60 |
| 6.3.1 | Logical Storage Pools at a High Level | 61 |
| 6.3.2 | Moving Information Across Pools—A Distillation Process | 62 |
| 6.4 | Archiving Through a New Lens | 62 |
| 6.4.1 | Archiving: The Makeover | 64 |
| 6.4.2 | Protecting Archived Data | 66 |
| 6.5 | Active Archiving and Deep Archiving | 66 |
| 6.5.1 | Active Archiving Requires Active Archive Management | 67 |
| 6.5.2 | Long-Term Archiving as Part of an Active Archive | 68 |
| 6.6 | ILM Changes the Data Protection Technology Mix | 69 |
| 6.7 | Key Takeaways | 70 |
| Chapter 7 | Compliance: A Key Piece of the GRC Puzzle | 73 |
| 7.1 | What to Look for in This Chapter | 73 |
| 7.2 | What Compliance Is All About | 73 |

| | | |
|------------------|--|------------|
| 7.3 | The Relationship Between Compliance and Risk Management | 74 |
| 7.4 | Compliance and Data Protection | 75 |
| 7.4.1 | What Must Be Done—Financial Reporting | 75 |
| 7.4.2 | What Must Not Be Done—Data Privacy Illustration | 79 |
| 7.5 | The Role of People in Compliance | 82 |
| 7.6 | The Role of Process in Compliance | 83 |
| 7.7 | The Role of Technology in Compliance | 84 |
| 7.8 | Key Takeaways | 85 |
| Chapter 8 | Governance: The Last Piece in the GRC Puzzle | 87 |
| 8.1 | What to Look for in This Chapter | 87 |
| 8.2 | Data Governance Must Respond to Changes in the Federal Rules of Civil Procedure | 88 |
| 8.2.1 | Data Knowledge Is a Data Protection Objective of Data Governance | 89 |
| 8.2.2 | Litigation Holds | 89 |
| 8.2.3 | Data Auditability Is a Data Protection Objective of Data Governance | 90 |
| 8.2.4 | ESI in Litigation Hold Should Be Placed in an Active Archive | 91 |
| 8.2.5 | Deciding What Data to Put on Litigation Hold May Be a Challenge | 91 |
| 8.2.6 | When Is Good Faith a Safe Harbor? | 92 |
| 8.2.7 | The Burden of Inaccessible Data | 92 |
| 8.2.8 | Sharing Responsibility | 93 |
| 8.3 | The Impact on Global Civil Litigation | 94 |
| 8.4 | The Big Three—Governance, Risk Management, and Compliance—and Data Protection Objectives | 95 |
| 8.4.1 | Data Protected Differs by Management Responsibility | 97 |
| 8.5 | Key Takeaways | 98 |
| Chapter 9 | The Critical Role of Data Retention | 101 |
| 9.1 | What to Look for in This Chapter | 101 |
| 9.2 | The Need for Data Retention Management | 101 |
| 9.3 | Where the Responsibility for Data Retention Policy Management Lies | 102 |
| 9.3.1 | The Limits of Ownership | 102 |

| | | |
|-------|---|-----|
| 9.3.2 | The Limits of Custodianship | 103 |
| 9.3.3 | The Limits of Stewardship | 104 |
| 9.3.4 | The Focus of Different Stewards and Custodians | 105 |
| 9.3.5 | The Data Governance Team | 106 |
| 9.4 | Making the Case for Archiving for Data Retention | 107 |
| 9.4.1 | Disposition of Data | 107 |
| 9.4.2 | Data Retention Required for Both Compliance and Governance | 108 |
| 9.5 | Creating Data Archive Storage Pools by Data Retention Attributes | 109 |
| 9.6 | Key Takeaways | 111 |

Chapter 10 Data Security—An Ongoing Challenge 113

| | | |
|---------|---|-----|
| 10.1 | What to Look for in This Chapter | 113 |
| 10.2 | How Data Protection and Data Security Are Interrelated | 113 |
| 10.3 | Information Security Versus Data Security | 114 |
| 10.4 | Information Assurance | 115 |
| 10.4.1 | Defining the Information Assurance Process | 116 |
| 10.4.2 | The Focus of Information Assurance | 117 |
| 10.5 | Information Risk Management | 119 |
| 10.6 | Data Preservation Is Data That Is Good to the Last Bit | 121 |
| 10.7 | Confidentiality as a Private and Public Concern | 121 |
| 10.8 | The Role of Data Availability in Data Security | 122 |
| 10.8.1 | Infrastructure-Centric Versus Information-Centric Security | 123 |
| 10.9 | Three Strategies for Protecting Confidentiality of Information | 124 |
| 10.10 | Confidentiality Through Limiting Access to Data | 125 |
| 10.10.1 | Access Control Basics | 125 |
| 10.10.2 | Access Control Techniques | 126 |
| 10.11 | Confidentiality Through Limiting Use of Information | 129 |
| 10.11.1 | Policy Stewards Play a Key Role in DLP | 130 |
| 10.11.2 | DLP Software Now Has the Final Say | 131 |
| 10.11.3 | Data Governance for Data Loss Prevention | 131 |

| | |
|--|------------|
| 10.12 Confidentiality by Rendering Information Unusable to Unauthorized Users | 132 |
| 10.12.1 Data-in-Flight Encryption | 132 |
| 10.12.2 Data-at-Rest Encryption | 133 |
| 10.13 The Special Case of Storage Security | 135 |
| 10.13.1 Remote Access to Storage as a Security Risk | 135 |
| 10.13.2 The Need to Secure SAN and NAS Storage | 136 |
| 10.14 Key Takeaways | 137 |
| Chapter 11 Where Data Protection Technologies Fit in the New Model | 139 |
| 11.1 What to Look for in This Chapter | 139 |
| 11.2 Categorizing Data Protection Products | 139 |
| 11.3 Mapping the Base Data Protection Technologies to the ILM Version of the Data Protection Framework | 143 |
| 11.4 Key Takeaways | 144 |
| Chapter 12 Back to Basics—Extending the Current Model | 145 |
| 12.1 What to Look for in This Chapter | 145 |
| 12.2 The Move to Multiple-Parity RAID | 145 |
| 12.3 Evolving Backup/Restore Software | 146 |
| 12.4 Recovery Management | 147 |
| 12.5 Moving Data Manually and Electronically—The Place of Vaulting and Consolidation | 149 |
| 12.6 Remote Office Data Protection | 150 |
| 12.6.1 Straightforward Backup Consolidation | 150 |
| 12.6.2 Backup Consolidation as a By-product of Server-Storage Consolidation | 151 |
| 12.7 At Your Service—The Role of Service Suppliers | 152 |
| 12.8 Key Takeaways | 152 |
| Chapter 13 When Supporting Actors Play Lead Roles | 155 |
| 13.1 What to Look for in This Chapter | 155 |
| 13.2 Data Deduplication and Other Space-Saving Technologies | 156 |
| 13.3 WAN Acceleration | 158 |
| 13.4 Data Protection Management | 159 |

| | |
|--|------------|
| 13.5 Data Protection Change Management | 162 |
| 13.6 Disaster Recovery Testing | 162 |
| 13.7 Data Classification | 163 |
| 13.7.1 Looking at Data Classification Through Different Lenses | 164 |
| 13.8 Key Takeaways | 166 |
| Chapter 14 Disk and Tape—Complementing and Competing with One Another | 169 |
| 14.1 What to Look for in This Chapter | 169 |
| 14.2 Disk-Based Backup | 170 |
| 14.3 Speeding up the Backup/Restore Process—Your Mileage May Vary | 170 |
| 14.4 Improving Restore Reliability | 171 |
| 14.5 Keep in Mind | 172 |
| 14.6 Virtual Tape | 173 |
| 14.7 Virtual Tape Library | 173 |
| 14.8 MAID | 174 |
| 14.9 Removable Disk Drives and Disk Media | 175 |
| 14.10 Data Protection Appliances | 176 |
| 14.11 Tape Automation | 177 |
| 14.12 Key Takeaways | 179 |
| Chapter 15 Technologies for High Availability and Low (or No) Data Loss | 181 |
| 15.1 What to Look for in This Chapter | 181 |
| 15.2 Copy Strategies | 182 |
| 15.2.1 Point-in-Time Copy | 183 |
| 15.2.2 Continuous Data Protection | 184 |
| 15.2.3 Scheduled-Image Data Protection | 185 |
| 15.3 Replication Strategies | 186 |
| 15.3.1 Mirroring | 187 |
| 15.3.2 Dated Replication—Pay Close Attention | 190 |
| 15.4 Key Takeaways | 192 |
| Chapter 16 Special Requirements for Compliance, Governance, and Data Security | 193 |
| 16.1 What to Look for in This Chapter | 193 |
| 16.2 The Use of WORM Technology | 194 |

| | | |
|--------|--|-----|
| 16.2.1 | Issues with Physically Destroying WORM Media | 194 |
| 16.3 | WORM Tape | 195 |
| 16.4 | WORM Disk | 196 |
| 16.5 | Electronic Locking | 197 |
| 16.6 | Guaranteeing the Authenticity of Data | 197 |
| 16.7 | Encryption Techniques | 197 |
| 16.7.1 | Software-Based Encryption | 197 |
| 16.7.2 | Encryption Appliance | 198 |
| 16.7.3 | Full Disk Encryption | 198 |
| 16.7.4 | Drive-Based Tape Encryption | 199 |
| 16.7.5 | Router-Based Tape Encryption | 199 |
| 16.7.6 | Switch-Based Encryption | 199 |
| 16.8 | Compliance/Governance Appliance | 200 |
| 16.9 | Data Shredding | 200 |
| 16.10 | Key Takeaways | 203 |

| | | |
|-------------------|---|------------|
| Chapter 17 | eDiscovery and the Electronic Discovery Reference Model | 205 |
| 17.1 | What to Look for in This Chapter | 205 |
| 17.2 | Information Management—Getting eDiscovery Off on the Right Foot | 207 |
| 17.2.1 | The eDiscovery Information Management Process | 207 |
| 17.2.2 | Records Management—Back to the Future | 208 |
| 17.2.3 | Data Mapping—Carrying Out the Data Knowledge Imperative | 209 |
| 17.2.4 | Again a Return to the Need for Data Governance | 211 |
| 17.3 | Overview of the Steps of the EDRM Model | 211 |
| 17.3.1 | Identification | 212 |
| 17.3.2 | Preservation | 213 |
| 17.3.3 | Collection | 216 |
| 17.3.4 | Processing | 218 |
| 17.3.5 | Review | 220 |
| 17.3.6 | Analysis | 221 |
| 17.3.7 | Production | 222 |
| 17.3.8 | Presentation | 223 |
| 17.4 | Key Takeaways | 223 |

| | | |
|-------------------|--|------------|
| Chapter 18 | Cloud Computing, SaaS, and Other Data Protection Services | 225 |
| 18.1 | What to Look for in This Chapter | 225 |
| 18.2 | Growth in Services Raises Questions for Data Protection | 225 |
| 18.2.1 | Service-Related Data Protection Issues | 226 |
| 18.2.2 | The Off-Premises Third-Party Services Food Chain | 227 |
| 18.2.3 | Services Point Toward Utility Computing | 228 |
| 18.3 | An Introduction to Cloud Computing | 229 |
| 18.3.1 | Common Characteristics for Hosted or On-Premises Cloud Computing | 229 |
| 18.3.2 | Characteristics of Hosted Cloud Computing | 231 |
| 18.3.3 | An Introduction to Software-as-a-Service | 233 |
| 18.3.4 | An Introduction to Storage-as-a-Service | 234 |
| 18.4 | Where IT Services Are Headed | 234 |
| 18.4.1 | The Drivers for the Services Model | 234 |
| 18.4.2 | IT for Competitive Advantage Is Still Important | 235 |
| 18.5 | Data Protection Considerations in Using a Services Model | 236 |
| 18.5.1 | Data Protection Requirements When Using a Third-Party Supplier | 237 |
| 18.5.2 | Businesses Cannot Abrogate Responsibility | 237 |
| 18.5.3 | Businesses Must Get What They Need Done for Their Data | 238 |
| 18.5.4 | How Does the Third-Party Supplier Deliver Its Capabilities | 239 |
| 18.5.5 | The Need to Know Location for Data Protection Purposes | 241 |
| 18.5.6 | The Need for Formal Service-Level Agreements | 242 |
| 18.6 | Confronting the Issue of Control and Third-Party Services | 244 |
| 18.7 | Key Takeaways | 246 |

| | |
|---|------------|
| Chapter 19 Other Considerations in Data Protection | 249 |
| 19.1 What to Look for in This Chapter | 249 |
| 19.2 From Flash Computing to Tape—The Role of Tiering in Data Protection | 249 |
| 19.2.1 Tier 0 SSDs | 250 |
| 19.2.2 Tier1 FC and SAS | 253 |
| 19.2.3 Tier 2 SATA | 254 |
| 19.2.4 Tier 3 Tape | 255 |
| 19.3 The Impact of Server and Storage Virtualization on Data Protection | 255 |
| 19.3.1 An Overview of Server Virtualization | 256 |
| 19.3.2 Server Virtualization and Data Protection | 257 |
| 19.3.3 How Virtualization and High Availability Go Together | 258 |
| 19.3.4 How Virtualization and Operational Recovery Go Together | 259 |
| 19.3.5 How Virtualization and Disaster Recovery Go Together | 261 |
| 19.4 Master Data Management and Data Protection | 261 |
| 19.4.1 Referencing a Couple of Key IT Initiatives | 262 |
| 19.4.2 An Introduction to Master Data Management | 263 |
| 19.4.3 MDM Architecture | 264 |
| 19.4.4 Master Data Management and Data Governance | 265 |
| 19.4.5 The Need for a Data Governance Maturity Model | 266 |
| 19.5 Green Computing and Data Protection | 267 |
| 19.6 Key Takeaways | 270 |
| | |
| Chapter 20 Tying It All Together, Including the PRO-Tech Data Protection Model | 271 |
| 20.1 What to Look for in This Chapter | 271 |
| 20.2 The PRO-Tech Model for Data Protection | 272 |
| 20.3 The PRO-Tech Model—Level 1 | 274 |
| 20.3.1 Process Layer 1 | 274 |
| 20.3.2 Rules Layer 1 | 275 |
| 20.3.3 Order Layer 1 | 276 |
| 20.3.4 TECHnology Provisioning Layer 1 | 277 |

| | |
|---|------------|
| 20.4 Tying the PRO-Tech Layers to GRC Business Responsibilities | 279 |
| 20.5 Data Protection Is Everyone’s Business—Last Call for Data Governance | 281 |
| 20.6 Synthesizing a Data Protection Framework | 282 |
| 20.7 Guidelines for Data Protection | 284 |
| 20.8 The Challenge Ahead and a Call to Action | 285 |
| 20.9 Key Takeaways | 285 |
| Glossary | 287 |
| Index | 299 |
